ALLIGATOR TRAPPING IN PROGRES

Ray the trapper is actively working to safely capture alligators in our community. The process has been delayed due to residents approaching or watching the area. Please remain clear of the site to allow safe and efficient capture.

Why Staying Clear Is Important

- Distracts the alligator
- Causes the alligator to move away from the trap
- Delays the capture process

What Residents Should Do

- Stay clear of the trapping area
- Keep children and pets away
- Allow trappers space to work

The trapper is using baby alligator sounds to attract the alligator. Please stay clear of the area.

JOIN US ON THE PUTTING GREEN

Saturday, Jan. 17 from 10 a.m. - noon

Hi everyone. Grab your putter and head over to our new Island Walk Putting Green. If you don't have a putter, no problem, we will provide a few putters for your use. The putting green will be set up as a 9-hole miniature golf course. Come on out and play a round. Also, members of the Putting Green Committee will be on hand to answer questions and explain the different activities being offered at the green. There are activities for all age levels from pre-teen to senior citizens and all skill levels from persons who have never played miniature golf to experienced golfers.

Food and drinks provided!

LAKES COMMITTEE OPPORTUNITIES AND CHALLENGES IN 2026

The Lakes Committee has in its 2026 budget funds for continuing the upgrading of our Lake Aeration System, stocking more fish in the lakes, planting more littorals, and adding one or more boat launch areas. However, as our eco systems changes we will need to adjust and treat the problems that develop. The past 2 years we have had trouble keeping up with the tape grass that dies off, is eaten by the snails and pushed to the surface by the invasive fish. That is happening in our north lakes. We just added a second treatment of the herbicide Sonar to help keep the tape grass under control better in 2026. In 2025 our water level climbed from 7.6 feet to 11.2 feet in a little over a month. Then it dropped a foot a few weeks later and that along with the hot dry weather that followed allowed for the Chara algae to grow rapidly in our Southeast lakes and it took nearly 2 months of algaecide treatments to get it under control. The technicians from our Lake Manager will keep a close eye on that and start treating it as soon as it starts to develop. The pictures below show the problems that this caused in 2025.

LAKES COMMITTEE OPPORTUNITIES AND CHALLENGES IN 2026

Now this year we are experiencing washouts and erosion on the shorelines and around the bridges. We are discussing how to best treat these areas. We would like to start a Erosion Task Force to recommend how to treat and protect our shoreline and bridges. Let me know if you would like to help. As we move forward in 2026 with new leadership.

Thanks,

Dick Norwood
